## LANGUAGES

English - Fluent

Brazilian Portuguese - Native

## SKILLS

- Fast learner, self-taught professional
- Team worker and tech mentor
- Web Engineer and Cloud Architect
- Scrum lover and enthusiast
- Polyglot: PHP, Python, Java, JS, Go
- Automation freak, Git heavy user

## EDUCATION

### Technician in Electronics

CEFET - Centro Federal de  
Educação Tecnológica  
Maceió, Alagoas, Brasil

1999 - 2003

## AWARDS

### 2018 Catho Hackathon

Won 2 out of 3 prizes:  
"Ready for Production" &  
"Innovation" categories

# GERALDO ANDRADE

## PROFILE

Strategic Senior Software Engineer and technical leader with 16+ years of building enterprise-scale systems and guiding engineering excellence. Specialized in cloud architecture, infrastructure automation, and transforming monolithic applications into resilient micro-services. Combines deep technical expertise in backend development with proven ability to mentor teams and drive organizational growth.

## EXPERIENCE

### Senior Software Engineer; Frankfurt, Germany — 07/2023-current

#### DE-CIX

Back-end software engineer focused on Python, Kubernetes, Postgres, Kafka, and Azure. My main contributions are:

- Infrastructure migration from on-premise to Azure Kubernetes
- Implement event-driven architecture using Kafka
- Mentoring working students and teammates
- Improved CI/CD pipelines and development workflows

### Senior Software Engineer / Cloud Architect at banbutsu; Berlin, Germany — 01/2021-07/2023

Back-end software engineer focused on Go, Kubernetes, Postgres, GCP, and Azure. My main contributions are:

- Architect and implementation of banbutsu's platform using micro-services architecture
- Standardising CI/CD processes with Gitlab pipelines, containers, and Helm deployments
- Code as infrastructure implementation using Terraform and Ansible
- Infrastructure migration from Azure to GCP (92% cost reduction)
- Mentoring other engineers

### Principal Software Engineer at Humanitec; Berlin, Germany — 12/2018-12/2020

Back-end software engineer focused on Python 3, Django, Go, Kubernetes, Postgres, and Google Cloud Platform. My main contributions are:

- Improvement of CI/CD processes with automatic deployments using Helm
- Move from a Python monolith to a Python/Go micro-services architecture
- Improvement of REST API design, documentation and implementation
- Mentoring junior engineers
- Webinars using Humanitec Platform API integrating with Kubernetes in AWS, GCP, and Azure

### Team Leader at Catho; São Paulo, Brasil — 03/2018-12/2018

Engineering Team Leader managing 7 developers, focused on team growth, cloud migration, and technical mentorship.

- Led cloud migration from on-premise infrastructure to AWS
- Collaborated with Product Owner and Product Department
- Mentored working students and junior developers
- Technical mentorship across Python, JavaScript, Java, Scrum, and AWS

### Senior Software Engineer Specialist at Catho; São Paulo, Brasil — 07/2017-02/2018

Web development specialist focused on legacy modernization and Salesforce integration.

- Designed Node.js middleware API for Salesforce integration
- Initiated Domain-Driven Design sessions for microservices decomposition
- Architecture committee member advocating Golang, Node.js, Python, and AWS

### Senior Software Engineer at Predicta; São Paulo, Brasil — 03/2013-06/2017

Back-end engineer at an ad tech company, building high-availability systems handling up to 40K requests/second.

- Built the Data Management Platform (DMP) from the ground up in Java
- Maintained Ad Serving and Tag Manager systems (3K-40K RPS)
- Developed internal campaign management application

**Lead Developer at Agência Blue; Alagoas, Brasil — 07/2012-03/2013**

Full stack developer responsible for Blue Framework built in PHP 5 and the Blue Admin CMS.

**Earlier Roles — 2008-2012**

Back-end Engineer at Rino, Plus! Agência Digital · Working Student at UFAL (Data Warehouse, Python) · Intern at CEPAL · Entrepreneur at Brasil Terra Sat
